Tools & Components for Serious Developers

## Create PDFs with Style

We set out to create the most robust Portable Document Format (PDF) generation tool for developers. Our core PDF Library is a full function class library developed with 100% Managed .NET code. You can use our core library to enhance your applications and deliver advanced PDF generation functionality. You can use it to build reports, generate response letters, build mail merge applications, fill server side forms and much more.

Our desktop tools will allow you to create robust PDF documents from text, extract text from PDF documents, Split and Merge previously created PDF documents and generate PDF documents from various image formats. We will continue to introduce additional desktop and server side tools.

In the course of our development, we strive to deliver functionality that keeps our developers in compliance with the growing number of standards and specs. Using our core library, you will be able to develop code that delivers standards based PDF documents that are not only 100% compliant with the PDF Standard but also compliant with the new PDF-A standard. The PDF-A standard outlines the rules for archiving documents so that they can viewed and accessed just the way they were created many years from now.

Working with our tools and core library is easy. We are continuously working on sample applications to assist you in your development cycle. We realize that creating PDF documents documents may only be a small part of your development effort so we have made every make the process simple. You may now create great looking PDF documents with just a few lines of code.

# features

## Fonts

- Standard Fonts
- True Type Fonts
- Open Type Fonts
- CJK Fonts
- Unicode
- Various Charset
- Fonts embedding

## Text Generation

- Text Format Options
- Multiple Columns
- Auto Text
- Justified Texts
- Text Boxes
- Tagged texts

## Drawing

- Various Shapes
- Hatch Brush
- Gradient Brush
- Layers
- Barcodes

## Images

- Vector images( EMF ,WMF support)
- Scalar Images
- Mask
- Transparency
- Stamps
- Watermarks

## Interactivity

- Acro Forms
- Form filling
- Flatten Acro Form Objects
- Form filling with XML, FDF or XFDF
- Attachments
- Annotations
- Bookmarks
- Actions

## Page Elements

- Margins
- Header and footer
- Unit of Measure
- Page Transitions
- Auto Page Numbering
- Thumbnails

## Settings

- Document Properties
- Custom Properties
- Page Orientation
- Page Sizes
- Viewer Prefences

## Security

- Encryption and Decryption
- Digital Signatures
- Recover owner password

## Conversion and Reporting

- HTML to PDF
- XML to PDF
- Text to PDF
- Tiff to PDF with CCITT Fax compression
- Text Extraction

## Misc Features

- PDF Page Templates
- Split, Merge and Extract functions
- PDF/ A-1b : 2005 Compatible
